Portfolio : dimasha.netlify.app

Professional Summary

Undergraduate Software Engineering student pursuing a BSc (Hons) in Software Engineering with strong knowledge of MERN stack development (React.js, Node.js, Express.js, MongoDB). Skilled in developing responsive full-stack web and mobile applications, RESTful APIs, and database-driven systems. Passionate about software development, problem solving, and learning modern technologies. Seeking a Software Engineering Internship opportunity to apply technical and collaborative skills in a professional environment.

Skills

TECHNICAL SKILLS :

- Programming Languages: JavaScript, Java, Python, HTML5, CSS3, C#
- Frontend Development: React.js, Responsive Web Design, UI/UX Design
- Backend Development: Node.js, Express.js, RESTful APIs, Microservices Architecture
- Mobile Development: Android Development, Android Studio
- Database Technologies: MongoDB, Mongoose ODM Development
- Tools: Git, GitHub, Docker, Kubernetes, Visual Studio Code, Postman
- Frameworks & Libraries: MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Deployment & Hosting: Netlify, Vercel, Render
- Development Methodologies: Agile, Scrum

SOFT SKILLS :

- Problem Solving, Team Collaboration, Time Management, Communication

Core Competencies

- Full-Stack Web Development
- Backend API Development
- Microservices Architecture
- REST API Development
- JWT Authentication
- Containerization with Docker
- Kubernetes Orchestration
- Database Design
- Responsive UI Development
- Android Application Development

PROFESSIONAL QUALIFICATIONS

- AI/ML Engineer – Stage 1 Certificate, SLIIT
- AI/ML Engineer – Stage 2 Certificate, SLIIT
- Front-End Web Development Certificate, University of Moratuwa
- Server-Side Web Programming Certificate, University of Moratuwa
- Agile Project Management in ICT Projects Certificate, University of Moratuwa
- Web Development Basics Certificate, IBM SkillsBuild
- Developing Sites for the Web Certificate, IBM SkillsBuild
- Foundational C# with Microsoft, freeCodeCamp

Education

- **BSc (Hons) in Software Engineering | 2023 – Present**
Sri Lanka Institute of Information Technology (SLIIT)
- **G.C.E. Advanced Level Examination – 2021**
Mahinda Rajapaksa College, Matara
- **G.C.E. Ordinary Level Examination – 2018**
Mahinda Rajapaksa College, Matara

PROJECTS

Doctor365 – Telemedicine & Healthcare Platform | Microservices Architecture (Group Project)

- Developed the Appointment Service for a microservices-based platform using Node.js, Express.js and MongoDB.
- Implemented appointment booking, updating, cancellation and status management features using RESTful APIs.
- Integrated JWT authentication and role-based access control for patients, doctors, and admins.
- Containerized services using Docker and managed deployments with Kubernetes.
- GitHub (Group Project): <https://github.com/ChamudithaSanka/doctor365>

OpenLesson – Volunteer Teaching Platform | MERN Stack (Group Project)

- Developed the Teacher Management module for an educational platform connecting volunteer teachers and students.
- Implemented appointment booking, updating, cancellation and status management features using RESTful APIs.
- Implemented teacher dashboard, study material management, study session management, quiz creation, and profile management using Node.js, Express.js, and MongoDB.
- Integrated Zoom API to enable live virtual teaching sessions between teachers and students.
- GitHub (Group Project): <https://github.com/ChamudithaSanka/openlesson>
- Live Demo : <https://openlesson-sooty.vercel.app/>

EduQuiz – Educational Quiz Platform | MERN Stack (Deployed)

- Developed and deployed a full-stack quiz platform using React.js, Node.js, Express.js, and MongoDB.
- Implemented user authentication and RESTful APIs for secure and scalable data management.
- GitHub Frontend : <https://github.com/Dimasha2002/eduquiz-platform-frontend>
- GitHub Backend : <https://github.com/Dimasha2002/eduquiz-platform-backend>
- Live Demo : <https://eduquiz-platform-frontend.onrender.com>

PayMyHostel – Hostel Payment Management System | MERN Stack (Deployed)

- Developed and deployed a full-stack system to manage hostel payments and student records.
- Implemented CRUD operations and secure backend data handling with RESTful APIs.
- GitHub Frontend : <https://github.com/Dimasha2002/PayMyHostel-frontend>
- GitHub Backend : <https://github.com/Dimasha2002/PayMyHostel-backend>
- Live Demo : <https://paymyhostel-frontend.onrender.com>

MyCVLab – Professional CV Generator | Full Stack

- Developed a web application to create professional CVs using multiple templates.
- Implemented live preview and PDF export functionality with persistent data storage.
- GitHub : <https://github.com/Dimasha2002/MyCVLab>

PassPilot – Password Generator | Frontend (Deployed)

- Platform to create professional CVs with multiple templates and PDF download.
- Implemented user authentication and live preview functionality.
- GitHub : <https://github.com/Dimasha2002/PassPilot>
- Live Demo : <https://pass-pilot.vercel.app>

MyWellness – Habit Tracker & Wellness App | Android

- Developed a mobile application to help users build and maintain healthy daily routines.
- Implemented habit tracking and motivation-focused features to improve user engagement.
- GitHub : <https://github.com/Dimasha2002/MyWellness>

TraceBack – Lost & Found Community App | Android

- Developed a mobile application to report and locate lost items within a community.
- Implemented item posting and searching features with simple data management.
- GitHub : <https://github.com/Dimasha2002/TraceBackAPP>

Languages

- Sinhala – Native
- English – Intermediate
